

MessageWatcher – E-mail Archiving and Surveillance.

For firms needing to deal with regulatory compliance, eDiscovery or simply reducing the risk inherent in employees' electronic communication. Call us at 1-888-317-FAST.

"If anyone doubted the value of a misplaced e-mail, Morgan Stanley affirms it: \$1.45 billion. That's how much a Florida jury awarded financier and Revlon chairman Ronald Perelman last month after the judge, enraged by Morgan's repeated failure to produce electronic evidence on time, ordered jurors to assume Morgan had helped defraud Perelman in client Sunbeam Corp.'s purchase of a Perelman-owned company."

"Hold Everything", Fortune, June 20, 2005 by Daniel Fisher.

"It is important to monitor the implementation of Sabanes-Oxley"

Fed Chairman Bernanke in his monetary policy testimony before Congress 7/20/06

"You should address e-mail records management now. Waiting ...could place your enterprise at risk, given regulatory requirements and escalating requests for electronic discovery."

"Adopt Active E-mail Archiving Now", Gartner Group, December 2003.

Up to 70% of business-critical information may be in an organization's corporate messaging system.

The Enterprise Storage Group, 2004.

"Much of the government's case—which led KPMG to admit to criminal wrongdoing and agree to pay \$456 million—is built on e-mails that would make any defense lawyer cringe. 'The e-mails are smoking guns,'" said the plaintiff's attorney "after uncovering damaging e-mails in discovery proceedings."

"Smoking E-mails", Forbes, October 3, 2005 by Janet Navack.

Frank Quattrone's e-mail stating "Today, it's administrative housekeeping. In January, it could be improper destruction of evidence" was a significant part of the case leading to Mr. Quattrone and Credit Suisse First Boston paying significant fines.

United States Of America v. Frank Quattrone. Indictment. United States District Court.

If your organization is hit with audit requests, discovery requests, subpoenas or similar demands for emails you need a tool that will allow you to import old email backup files, archive current email, and provide an ongoing repository that is scalable, easily searchable and affordable. You need MessageWatcher from ContentFast.

Archiving

- Import old email files (.edb, .pst, etc.)
- Audits, lost data, data mining made easy with the archive and its associated search capabilities
- Online based archive of e-mails and instant messages
- Real-time data as opposed to point-in-time backups
- Advanced search options speed information retrieval process
- Flexible reporting options to create automatic or ad hoc reports
- Definable retention policies based on content
- Multiple access levels for employees, compliance officers, corporate officers, legal department, etc.
- Highly scalable
- Single Instance Storage to minimize storage requirements
- Audit trails provide comprehensive activity logs

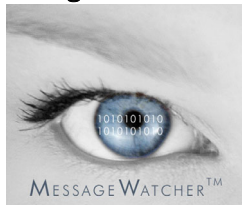

Surveillance

- Scan words and phrases
- Quarantine policy-violating e-mails
- Automatically encrypt emails that contain certain words or phrases
- Route flagged messages based on word category
- Monitor multiple languages
- Define exclusions based on To, From, Subject or Content fields
- Monitor external & internal e-mail and instant messages
- Automatically scan using open and customizable policies
- Open and definable rule sets
- Scan and view attachments
- Review and administer based on groups
- Pre- or post-review definable by group, user, direction or keyword for e-mail
- Disclaimers automatically inserted based on content
- Store comments & notes along with e-mails or instant messages

One of your best tools can become one of your greatest liabilities. As much as e-mail contributes to productivity, it also contributes toward risk. Your e-mail can come back to haunt you in lawsuits, audits, and government investigations.

With MessageWatcher software, you control your e-mail environment and reduce the risks posed by employee e-mails.

MessageWatcher® software can help you minimize your exposure to:

Lawsuits or fines related to

- Illegal Activity
- Regulatory Violations
- Sexual Harassment
- Discrimination
- Workplace Violence

Employee theft of

- Intellectual Property
- Customer Lists
- Research & Development
- Financial Records
- Data from Clients

Reduce Labor and I.T. Costs related to compliance, archiving, and lawsuits.

- MessageWatcher provides fully compliant archiving.
- Reduce times spent monitoring email by using predefined policies & rules.
- MessageWatcher's online archive uses several compression technologies to minimize the costs associated with storage hardware and software.
- Help prevent lawsuits from happening or demonstrate good faith effort to protect employees.
- MessageWatcher can help prevent the theft of valuable intellectual property.
- Legal discovery (eDiscovery) costs are greatly reduced with our solution.

Turning your company's electronic communications into an asset not a liability!™
